# Our Department

- We Triage all referrals by a clinician, to determine appropriate management, which may include Diagnostics prior to appointment or advice and guidance.
- Face to face appointments are given only if triage deems it appropriate.
- We access shared medical records only (where consent given)
- One-stop appointment for most routine appointments with short waiting time.
- Direct access to appropriate diagnostic tests/ (Results are sent back within 2-3 days)
- Timely communication of clinical management plan back to GP practice by writing and seamlessly into patient’s record.

Get to know
OUR TEAM

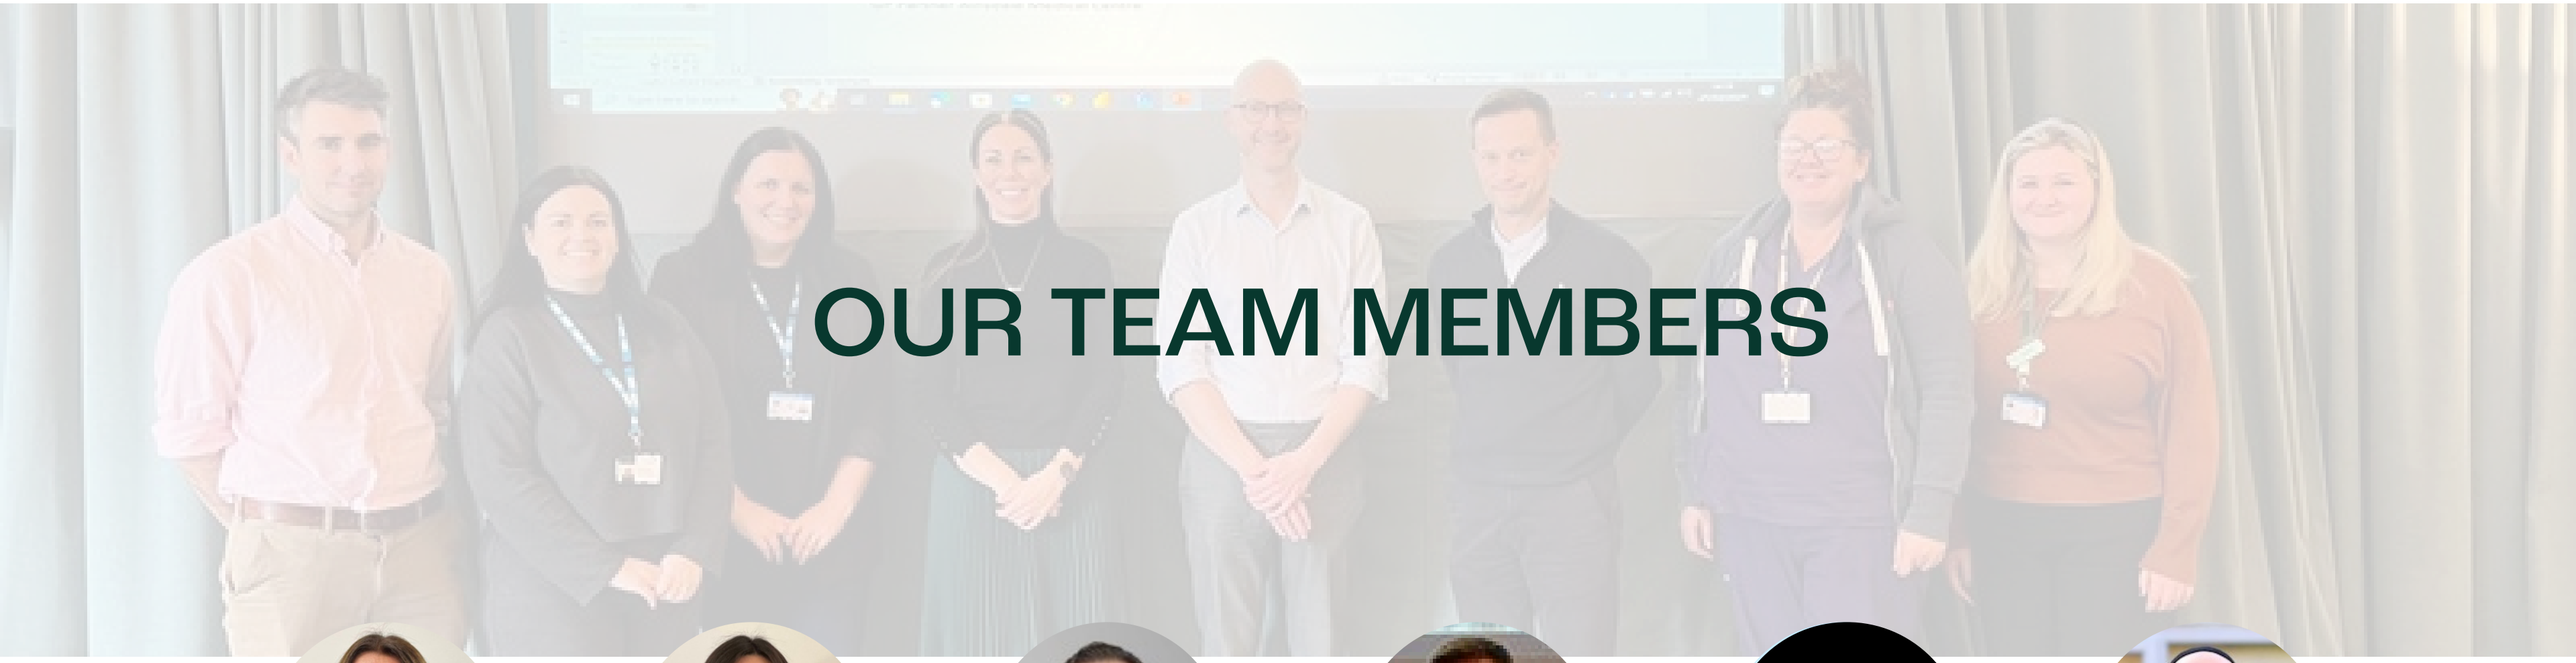

# OUR TEAM

Our Community Cardiology service provides specialised guidance in the management of current cardiac symptoms.

General Practitioners may refer to our service for a consultant assessment, diagnosis and management plan with a non-urgent cardiac condition, or if you need an echocardiogram, 24-hour electrocardiogram (ECG) monitoring or 24-hour blood pressure (BP) monitoring.
